

GALAXY BRUSHES

Pig Brushes for Pipeline & Well Bore Maintenance

PIG BRUSHES

Our universal Pig Brush tooling can produce a wide variety of sizes and configurations that meet the highest industry standards and produce a finish second to none.

- Available in carbon steel and stainless steel
- Custom configurations
- Close tolerance trim lengths
- Strong, custom made plates, not pre-perforated sheets
- Built to suit all pig requirements

PENCIL BRUSHES

The all-new patent pending Razorback™ Pencil End Brush is uniquely engineered with a revolutionary design and high quality construction that virtually eliminates breakage within the pipe, which as we all know can lead to costly clean ups. Our specially constructed wrap design prevents this and achieves results other pencil brushes simply can not.

- For use with intelligent pigs and wellbore cleaning
- Made from steel, tinned steel, nickel plated steel, stainless steel, and plastic bristles
- Unique construction eliminates need for glued, soldered, or welded construction
- Maintains brush integrity even if several strands are broken during use
- Less likely to come apart during use than glued, soldered, or welded brushes
- Build to all requirements

Remember...
 Ask for the Razorback™,
 the #1 Pig Brush in the Industry

Let Galaxy Brushes' Engineering team solve your application needs. We can help with the interface of our brushes to your tooling. Galaxy Brushes' CNC equipped machine shop and fabrication facility help ensure on time delivery.
